Account ID: 1082821**Acceptor ID:** 428225692881**Gateway MID:** 428225692881**Default Terminal ID:** 2904842**Express Production Interface URL's**

Note that caching of IP addresses of Express is prohibited. For load-balancing and redundancy reasons, Express transaction processing is divided among several data centers. Therefore, the DNS service should be used to determine the destination IP address of Express servers for each transaction. Requests should point to the appropriate URL only (not the IP address). Those Express platform URL's are identified below:

Transaction: <https://transaction.elementexpress.com>**Services:** <https://services.elementexpress.com>**Reporting:** <https://reporting.elementexpress.com>**Express Production IP Address Ranges**

The following IP Address ranges should be allowed within the merchant or integrator processing environment/firewalls to support full, redundant connectivity into the Express platform.

74.120.156.1 to 74.120.156.254 Port 443

74.120.157.1 to 74.120.157.254 Port 443

74.120.158.1 to 74.120.158.254 Port 443

74.120.159.1 to 74.120.159.254 Port 443
